

# Do You Have a **Water Efficient Urinal?**

## **AVOID THE PITFALLS OF NO-WATER AND LOW-WATER SYSTEMS**

Ecoblue harnesses the power of nature to convert compatible urinals to highly water efficient and odor free systems. The Ecoblue Cube slowly releases a blend of beneficial microbes that line and protect your bowl, trap and pipework. A synergistic blend of live cultures, free enzymes and plant-based surfactants eliminate the culprits of odor and minimize the formation of scale and blockages. Nature does the work, leaving you with a clean, smart and water efficient urinal.

### **ECONOMIC BENEFITS**

- A reliable and effective alternative to no-water or low-water urinal upgrades.
- Reduces flush water by up to 95%. Protects against continuously rising water costs.
- No need for costly deodorizers or sanitizers.
- Reduced urinal problems means fewer plumbing service calls.

### **ELIMINATE ODORS**

- Natural enzymes work by eliminating offensive odor at the source, preventing harmful bacteria and pathogens.

### **SIMPLIFY MAINTENANCE**

- Compatible urinals can be easily retrofitted with minimal hardware conversion.
- A synergistic blend of live cultures, free enzymes and plant-based surfactants, eliminate the culprits of odor and minimize the formation of scale and blockages.
- Simply install one cube per urinal, and the process starts working.

### **ECOBBLUE FLUSH SAVER UNIT**

- Programs the urinal to flush at an appropriate interval for your facility. Flush options include every 1, 2, 3, 4 and 6 hours.
- Offers reliable performance that's simple to install and convenient to maintain.
- Touchless operation improves hygiene.

### **REDUCE ENVIRONMENTAL IMPACT**

- Naturally eliminates urinal odors and reduces salt formation without the use of chemicals that harm people, pipework and our planet.
- Biodegradable formula reduces environmental impacts associated with conventional cleaning procedures.
- Contributes beneficial microbes which augment the waste water treatment process and assist with septic systems.
- Helps facilities meet LEED certification through green cleaning and water efficiency.
