

Do You Love Your **Waterfree Urinal?**

ECOBBLUE MAKES WATERFREE, WORK BETTER

The Ecoblue Cube slowly releases a proprietary blend of beneficial microbes that line and protect your bowl, trap and pipework. A synergistic blend of live cultures, free enzymes and plant-based surfactants eliminate the culprits of odor and minimize the formation of scale and blockages. Nature does the work, leaving you with a clean, odor free waterfree urinal.

ECONOMIC BENEFITS

- No need for costly deodorizers or sanitizers, and significantly extends the life of cartridges.
- By highly improving the function of waterfree urinals, plumbing service calls are reduced.
- Requires no urinal modifications.

ELIMINATE ODORS

- Natural enzymes work by attacking offensive odor at the source, eliminating bacteria, pathogens, and the need to purchase separate deodorizers.

SIMPLIFY MAINTENANCE

- A synergistic blend of live cultures, free enzymes and plant-based surfactants, eliminate the culprits of odor and minimize the formation of scale and blockages.
- Simply install one cube per urinal, and the process starts working.
- Significantly extends cartridge life while eliminating common blockages and the need for trap sealant.

REDUCE ENVIRONMENTAL IMPACT

- Naturally eliminates urinal odors and reduces salt formation without the use of chemicals that harm people, pipework and our planet.
- Biodegradable formula reduces environmental impacts associated with conventional cleaning procedures.
- Reduces the number of cartridges in landfills.
- Contributes beneficial microbes which augment the waste water treatment process and assist with septic systems.
- Helps facilities meet LEED certification.

Save Water, Share Water
